Leeline Bags

Factory Capability Sheet
Custom bag manufacturing · OEM & ODM
Wuhan, Hubei, China · Est. 2015

CUSTOM BAGS MANUFACTURER

One Floor, One Signed Sample, One Order That Ships as Approved.

Everything below is a fact a buyer can inspect on a visit or hold us to in writing. The figures are the factory's own, not a category average.

2015	50,000 m²	500+	500K	2,000+	35+
FOUNDED	SINGLE FLOOR	SKILLED WORKERS	UNITS / MONTH	BRANDS SUPPLIED	COUNTRIES SHIPPED

HOW AN ORDER RUNS

Day 0 — Send the brief
A sketch, a photo, a tech pack or a half-formed idea all start it. Back within one business day: a named English-speaking PM, not a shared inbox.

Day 1–3 — Spec & line-item quote
The brief becomes a buildable spec — pattern, materials, hardware, construction — priced line by line. Minimum order, tooling, unit cost and timeline, all in writing.

Day 4–10 — Sample in hand
A physical pre-production sample in the real materials and finish, revised until the construction is right. On approval it is signed off — nothing goes unapproved.

Week 2–8 — Production & documented QC
Cut and stitched on automated lines, inspected at each station until defects drop below 0.5%. Photo and video updates through the run, then the inspection report.

Delivery — DDP, warehousing or dropship
One dock clears export documents — DDP shipping, overseas warehousing and dropshipping — with tracking, import paperwork and pallets landing on the promised date.

After — Same engineer, next run
Reorders, tweaks and material swaps come back to the engineer who built the first order, so the second run starts from the signed sample rather than from scratch.

WHAT YOU CONTROL

- Fabric & lining
- Hardware & fittings
- Structure & pattern
- Logo & branding
- Print & embroidery
- Pantone matching
- Packaging
- Swing tags

QUALITY CONTROL

Checked at every stage, not sorted at the end.
In-process checks on the sewing floor, a 10–20% final inspection ratio, and thread rated 10% above the industry norm. Every figure is recorded against the spec, so a defect found at the dock can be traced back to the station that produced it.

AUDITED TO

ISO 9001 Quality management	**BSCI** Social compliance
OEKO-TEX 100 Fabric safety	**GRS** Recycled content

Recycled options run on any line, not a separate green range. 90% of production waste is recycled.

100 pcs	7 days	99.5%	<0.5%
MINIMUM ORDER	SAMPLE LEAD TIME	SAMPLE APPROVED FIRST PASS	DEFECT RATE, DOCUMENTED

Ask for the record behind any line.
Every number here is one the factory will put in writing and let you
